

SEMAGLUTIDE INFORMATION &

WHAT TO EXPECT FROM OUR PROGRAM:

What should I tell my care team before I take this medication?

- Endocrine tumors (MEN 2) or if someone in your family had these tumors
- Eye disease, vision problems
- History of pancreatitis
- Kidney disease
- Stomach problems
- Thyroid cancer or if someone in your family had thyroid cancer
- An unusual or allergic reaction to Semaglutide, other medications, foods, dyes, or preservatives
- Pregnant or trying to get pregnant
- Breast-feeding

It is very important that your doctor check your progress at regular visits to make sure that this medicine is working properly. Blood and urine tests may be needed to check for unwanted effects.

Tell your doctor if you are pregnant or planning to become pregnant. Do not use this medicine for at least 2 months before you plan to become pregnant.

It is very important to carefully follow any instructions from your health care team about:

- **Alcohol**—Drinking alcohol may cause severe low blood sugar. Discuss this with your health care team.
- **Other medicines**—Do not take other medicines during the time you are using Semaglutide unless they have been discussed with your doctor. This especially includes nonprescription medicines such as aspirin, and medicines for appetite control, asthma, colds, cough, hay fever, or sinus problems.
